

THE PROCEDURE OF CONDUCTING THE GAME AND THE WINNING OPTIONS

Sic Bo is an ongoing game which gives players the opportunity to join at any time. Players are given at least 5 seconds to make a bet(s). To participate in the game, the player must select chips with the preferred nominal value (for example, 50 AMD, 100 AMD, 200 AMD, 500 AMD, 1000 AMD) by clicking on it and choose the outcome(s) offered in the game. To select the outcome(s), the player clicks on the corresponding section(s) for bets. To confirm the bet, the player can click on the "Place Bet" button, or the bet(s) will be automatically accepted after the end of the time for making bets. Then the player needs to wait until the game starts.

The game involves three dice that roll and each stops randomly at one of the numbers from 1 to 6. The player who correctly guesses the proposed outcome(s) wins.

During the round, the players are given the opportunity to bet on all the proposed outcomes.

The outcomes of the Sic Bo game are:

Outcome	Description
Small bet	The bet wins if the sum of the numbers on the three dice is between 4 and 10 points. The bet does not win if three dice have the same number, for example, 2, 2, 2 or 3, 3, 3.
Big bet	The bet wins if the sum of the numbers on the three dice is between 11 and 17 points. The bet does not win if three dice have the same number, for example, 4, 4, 4 or 5, 5, 5.
Bet on a specific three	The bet wins if three dice have the same numbers. For example, if a player has made a bet on three 5s and on the dice is shown three 5 number.
Bets on any three	The bet wins if any of the same numbers appear on the three dice. For example, if a player made this bet, he will win if the dice are either three pieces 1, or three pieces 2, or three pieces 3, or three pieces 4, or three pieces 5, or three pieces 6.
Bet on a specific pair	The bet wins if the three dice have two identical numbers chosen by the player.
Bet on the total sum of the numbers on the three dice (except when the	The bet wins if the sum of the numbers on the dice matches the total of

sum is 3 and 18)	the dice numbers the player has chosen and placed a bet. For example, if a bet is made on a total of 10, the player wins if the number of the dice is 3-2-5 or 1-3-6 or any other combination, the sum of which is 10.
Bet on a combination of numbers on two dice	This type of bet is made on a combination of numbers on any of the two dice. The player wins if correctly guesses the numbers on the two dice. For example, if the player chose combination 1, 2 and the released dice is 1, 5, 2, then the player wins.
Bet on the number on one dice	The bet wins if the player has placed a bet on one of the six numbers, for example, on 4, and at least on one of the three rolled dice is 4.

Each outcome has corresponding odds established by this regulation. Winnings are paid with the odds of the predicted outcome(s) according to the payable below:

The numbers on the dice are determined not at the moment of the game, but 10 games before. After the end of the game, players are given the opportunity to make sure that the combinations on the dice are created in advance, not during the game. At the end of the game round, players are given a code: by entering it in the appropriate program, they can make sure that the dice numbers were determined in advance, not during the play.

Disconnection policy: If a disconnection occurs after active game round and your bets were accepted by the server, the game will proceed as normal and any winnings will be processed according to the game result regardless of the disconnection.
